

High Speed Data Cables

“Ribbonized” Cable

High Speed Data Cables are “ribbonized” into a flat cable format to facilitate termination . Combinations of coax, twinax, twisted pairs etc. are combined into one completed cable per customer specifications. “Skip Bonded” constructions are available.

Highlighted capability

“Skip Bonded”: Flat Cables with bonded and un-bonded sections for flexibility and ease of termination.

Features & Benefits

- Cost Effective Mass Termination
- High Density
- Organized wire & cable package
- Optional: “Skip Bonded” for flexibility and ease of termination

Product Scope

Designed to Customers Specifications
