

High Speed Data Cables

High Speed Twisted Pairs

Wires 34 AWG and larger are insulated with high performance insulation materials and manufactured into twisted pairs using precise tension controls for consistent lay lengths.

Features & Benefits

- High Bandwidth
- Electrical Stability
- High Velocity of Propagation (>85%)
- Consistency
- Inside Minimum Bend Radius – 5X cable diameter
- Low Dielectric Constant Insulation
- Low Capacitance
- Solder Resistant Insulation
- Space Saving
- Lightweight

Product Scope

Typical Impedance	Jacket Material	Shield Type	Conductor Type
100 OHM	Polyurethane	Served	Solid
	FEP	Braid	Stranded
		Foil	

* Custom Constructions Wanted
